

Beyond Warehouse Management Solution

Beyond WMS is a warehouse management solution fully integrated with MYOB EXO and MYOB Advanced.

Overview

Beyond Warehouse Management Solution (WMS) is a fully integrated Warehouse Management Solution for MYOB EXO and MYOB Advanced.

WMS utilises mobile technology to maximise warehouse productivity and picking accuracy.

Implementation Process

1. Complete an information form so we can configure WMS to suit your requirements.
2. Provide access to your MYOB Advanced or EXO software so we can setup the integration.
3. Review of self-training documentation and provision of formal training warehouse personnel if required.

Who Should Consider?

- Businesses whose warehouse function requires a fully integrated solution to their MYOB ERP solution (EXO or Advanced)
- Warehouse managers who want to maximise their staff capabilities whilst streamlining processes. Franchise and speciality retailers.

When To Consider

- When the current warehousing processes cannot keep up with company growth and demand.
- When customers are not receiving their orders on time or in-correctly picked deliveries.
